COURSE OUTCOMES:-

After completion of the course, the student will be able to

CO1 : understand various techniques of improving soft skills and communication skills. (K_2)

CO2 : Apply critical thinking skills and evaluate different perspectives of a problem. (K_3)

CO3 : Solve problems and make effective decisions. (K_3)

CO4 : Demonstrate true empathy and learn how to recognize stress triggers and managing them. (K_2)

CO5 : Develop an understanding of professional etiquette in a corporate culture. (K_3)

COMMUNICATION SKILLS

EXPT. No. : 1 | 13/2/24
Date : 13/2/24

NAME OF THE EXPERIMENT

COMMUNICATION SKILLS

Page No. : 01
Roll No. : 2373A04107

Learning outcomes: At the end of this unit, student should be able to

- Understand soft skills in both theoretical and practical ways (L_2)
- Develop effective communication skills - both verbal and non-verbal. (L_3)
- Identify essential factors for personality development and bringing them into practice. (L_3)
- Demonstrate interpersonal skills through participating in various communication activities (L_2).

communication skills:-

communication skills are the abilities you use to convey and receive information including verbal and non-verbal communication, active, listening, empathy and confidence.

Introduction:-

poor communication skills, on the other hands, can sour relationships from business to personal, and make the life significantly harder.

EXPT. No. : 1
Date : 13/12/24

NAME OF THE EXPERIMENT

Page No. : 2
Roll No. : 2373A04107

Interpersonal communication skills :-

Interpersonal communication skills are divided broadly into verbal communication, Non-verbal communication and listening.

Verbal communication :-

Verbal communication is all about what we say, which is an important way of getting our message across.

Using our voice is only the tip of the iceberg :-

Actually communicate far more information using Non-verbal communication.

Listening

Active listening provides a lot more information about how to listen effectively and can also help you to avoid misunderstandings, and listening misconceptions. It is always worth thinking about what should not to do, as well as what should to do, when trying to develop the skills.

EXPT. No. : 1
Date : 13/8/24

NAME OF THE EXPERIMENT

Page No. : 3
Roll No. : 2373A04107

presentation skills :

presentations are far more than simply standing up in front of a screen and talking your way through a set of slides. They also include the ability to get your point across in meetings, both small and large, and even pitching your business idea to a potential investor.

Writing skills

This set of skills should not be limited to journalists or professional authors. poor written communication can be frustrating for the reader and potentially damaging for the author.

personal skills

for example, Improving your self-Esteem and Building confidence can help to feel more positive about abilities - including your ability to communicate. And feeling positive is the first step to acting more positively, and therefore effeciently.

CONVERSATION

Page No. : 7
Roll No. : 4107

Activity 2:- Make a conversation between the librarian and the student about asking the information about getting library cards and books.

A very good morning to everyone.

Today we (sruthi and saranya) are going to make a conversation between librarian and student about asking the information about getting library cards and books.

sruthi : Good Morning sir

saranya : Good morning. Do you need any help?

sruthi : Yes. I am searching for a book.

saranya : Do you have your library cards

Sruthi : No. How can I get it.

Saranya : Which class are you in?

Sruthi : I am in B.Tech 2nd year.

Saranya : Have you your Identity card?

sruthi : Yes, Here it is

Saranya : Ok, please fill in this form.

NAME OF THE EXPERIMENT

EXPT. No. : 2
Date : 20/12/24

Page No. : 8
Roll No. : 4107

sruthi : I have filled in this form. Here it is please.

(Sruthi) saranya : ok. please take your card. Which book do you need?

sruthi : I need book on electronics.

saranya : Well. That's on the shelf of the electronics department. can you find your book?

sruthi : Would you please help me to find the electronics book.

saranya : Here is the book.

sruthi : Thanks. How many books can I borrow at a time.

saranya : Two weeks

sruthi : sir, what happens if I return the book late?

saranya : If you return a book after the due date, you will have to pay a fine.

Sruthi : oh, I see. How much is the fine per day?

Saranya : The fine is 100 per day for each late book.

sruthi : That's reasonable. can I renew a book if I need it for a longer period?

NAME OF THE EXPERIMENT

EXPT. No. : 2
Date : 20/12/24

Page No. : 9
Roll No. : 4107

Saranya : yes, you can renew a book once, but only if no one else has requested it.

Sruthi : How do I renew a book? Do I have to come to the library?

Saranya : You can either visit the library or renew it online through the library portal.

Sruthi : That's great! I didn't know about the online renewal option. How do I access the library portal?

Saranya : You need to log in with your student ID on our website. If you don't have an account, you can create one at the front desk.

Sruthi : I'll do that soon. Also, do you have any books on artificial Intelligence?

Saranya : Yes, we have several books on AI. Would you like a specific author or just general information?

Sruthi : General Information would be fine. Can you suggest a good book?

EXPT. No. : 2
Date : 20/12/24

NAME OF THE EXPERIMENT

Page No. : 10
Roll No. : 4107

Saranya : Sure! "Artificial Intelligence : A Guide for thinking Humans" by Melanie Mitchell is a good one for beginners.

Sruthi : That sounds interesting. Where can I find it?

Saranya : It's in the technology section, on the third shelf from the left. I can help you find it if you need assistance.

Sruthi : Thank you! I'll try to find it myself first. By the way, do you also have e-books?

Saranya : Yes, we have to a collection of e-books that you can access through our digital library.

Sruthi : That's very convenient! How can I borrow an e-book?

Saranya : You just need to log into the library portal, search for the book, and click on the borrow option. You can read it online or download it for offline reading.

Sruthi : Thank you so much for all the information!

Saranya : You're welcome.

Activity 2:

Make a conversation between bank manager and getting the information about educational loan.

A very good morning to everyone.

Today we (sruthi and saranya) are going to make a conversation between Bank manager and student about asking Information of educational loan. My role (sruthi) is student and her (saranya) is Bank Manager.

sruthi : Execuse me sir, may I come in ?

saranya : yes, come in.

sruthi : Good morning sir/madam.

saranya : Good Morning ! How can I help you today ?

sruthi : My name is P. sruthi . I am 19 years old and I am student. I am seeking financial assistance to pursue M.Tech from Texas university . The total cost of the program/cource is nearly 30 lakshs and I am here to enquire about the education loan that your bank offers.

saranya : Of course, we offer education loan for students

pursuing post graduate or professional courses in India and abroad. could you tell me more about the courses you are planning to enroll in?

Sruthi : Sure madam, I have been admitted to a master's program in computer science at university in Texas, USA.

Saranya : congratulations! on your offer we offer loans for students for studies in India & Abroad what details do you need?

Sruthi : What are the document required for applying the loan madam?

Saranya : You will need,

1. Admission letter from university
2. Fee structure of course
3. proof of Identity like Aadhar card / pan card.
4. Address
5. Academic records & marksheets.
6. Entrance exam result.
7. Income proof of your co-applicant usually a parent / gaurdian.

Sruthi : Thank you madam, that's helpful. Are there any processing fees?

EXPT. No. : 2
Date : 20/12/24

NAME OF THE EXPERIMENT

Page No. : 13
Roll No. : 4107

Saranya : Yes, there is nominal processing fee, usually 1% of loan amount. It's based on loan scheme.

Sruthi : Thank you for the information sir! can I apply it online or do I need to visit the bank?

Saranya : you can start the application online, but you need to visit the bank for document submission and verification.

Sruthi : Got it sir, I will gather the required documents and visit soon. Thank you for your valuable time, madam.

Saranya : you are welcome feel free to reach out if you have any more questions. All the best for your studies.

Sruthi : Thank you madam, how long does it usually take for loan to get approved?

Saranya : The processing time varies depending on the bank's policies and the completeness of your documents. Generally, it takes around 7 to 15 working days after your submit all required documents. However, some banks offer faster processing for urgent cases.

NAME OF THE EXPERIMENT

EXPT. No. : 2
Date : 20/12/24

Page No. : 14
Roll No. : 4107

Sruthi : That's good to know. Is there any specific eligibility criteria for applying for this loan?

Saranya : Yes, the eligibility criteria usually include:

1. The applicant should be an Indian citizen.
2. The student must have secured admission in a recognized university or institution.
3. The course should be job-oriented, such as engineering, medical, management, or other professional courses.
4. The co-applicant (parent or guardian) should have a stable source of income.

Sruthi : Okay, I understand. DO I need to provide any collateral for the loan?

Saranya : It depends on the loan amount. Generally, loans up to a certain limit (like ₹4-7 lakshs) do not require collateral. However, for higher loan amounts, banks may ask for collateral security, such as property, fixed deposits, or assets. You will also need a gurantoo.

Sruthi : I see. What about the repayment process? When do I need to start repaying the loan?

NAME OF THE EXPERIMENT

EXPT. No. : 20
Date : 20/12/24

Page No. : 15
Roll No. : 4107

Saranya : Repayment usually begins after the course completion plus a moratorium period, which is typically six months to one year after getting a job. the repayment tenure can range from 5 to 15 years, depending on the loan amount and terms.

Sruthi : That sounds reasonable, are there any tax benefits associated with education loans?

Saranya : Yes! under section 80E of the Income tax act, the interest paid on the education loan can be claimed as a deducation. This benefit is available for a maximum of 8 years or until the interest is fully repaid, whichever is earlier.

Sruthi : That's really helpful information, Thank you madam.

The Future of Agriculture: Innovations and Challenges

This presentation explores the challenges and opportunities facing the agriculture industry in the 21st century. We will look at the latest innovations, the growing need for sustainable practices, and the role of technology in shaping the future of food production.

Feeding a Growing Population: The Need for Sustainable Agriculture

Growing Demand

The global population is expected to reach 9.7 billion by 2050, requiring increased food production to meet demand.

Sustainability

Sustainable agriculture practices are essential for protecting the environment and ensuring food security for future generations.

EXPT.No. : 4
Date : 10/9/25

Roll No. : 4107

Climate Change and Its Impact on Agriculture

Extreme Weather

Climate change is leading to more extreme weather events, such as droughts, floods, and heat waves, impacting crops and livestock.

Changing Patterns

Shifting precipitation patterns and rising temperatures are altering growing seasons and impacting crop yields.

Made with Gamma

Precision Agriculture: Leveraging Technology for Efficient Farming

Data-Driven Decisions

Precision agriculture uses sensors, drones, and data analytics to optimize resource use and improve efficiency.

Targeted Inputs

Farmers can apply fertilizers, pesticides, and water only where and when they are needed, minimizing waste and environmental impact.

Organic vs. Conventional Farming: Weighing the Pros and Cons

Organic Farming

Emphasis on natural methods, avoiding synthetic pesticides and fertilizers, promoting biodiversity, and reducing environmental impact.

Conventional Farming

Relies on synthetic inputs to increase yields and control pests. Often associated with higher yields, but may raise concerns about environmental sustainability.

Vertical Farming: A Solution to Urban Food Deserts

Space Efficiency

Vertical farming uses stacked layers to maximize space utilization, ideal for urban areas with limited land availability.

Sustainable Practices

Vertical farms can optimize water and energy use, reducing environmental impact and promoting sustainable agriculture.

Water Conservation in Agriculture: Strategies for a Drier Future

1. **Drip Irrigation**
   Targets water directly to plant roots, minimizing water loss through evaporation.
2. **Water Harvesting**
   Collecting and storing rainwater for use during dry periods.
3. **Drought-Tolerant Crops**
   Developing crops that can thrive in arid environments, reducing water requirements.

Made with Gamma

Genetic Engineering and Crop Improvement

1. **Disease Resistance**
   Genetically modified crops can be engineered to resist diseases, reducing crop losses and minimizing pesticide use.
2. **Increased Yield**
   Genetic modifications can enhance crop productivity, leading to higher yields and increased food production.
3. **Nutritional Enhancement**
   Crops can be engineered to have improved nutritional content, providing essential vitamins and minerals.

Reducing Food Waste: Innovative Solutions from Farm to Table

1

Farm Level

Minimizing crop losses and optimizing harvesting practices.

2

Processing & Distribution

Improving storage, transportation, and packaging to reduce spoilage.

3

Retail & Consumer Level

Encouraging mindful consumption, promoting food donation programs, and reducing food waste at home.

Made with Gamma

The Role of Policymakers and Consumers in Shaping the Future of Agriculture

1

Policy

Government policies that promote sustainable practices, support research, and incentivize innovation are crucial.

2

Consumers

Consumers can drive change by choosing sustainable products, reducing food waste, and supporting local farms.

Soft Skills :-

Soft skills are the attributes and behaviours describing how a person approaches taskes. They're particularly valued in the workplace, when they can impact your ability to communicate effectively, solve problems, and think critically.

Introduction :-

one soft skills meaning is interpersonal abilities that define how to interact with others and navigate various situations. These skills encompass the ways you communicate.

The top three important soft skills :-

Through many soft skills are valuable, three primary skills - oral and written communication, teamwork and collaboration, and critical thinking - are especially important and offen encompass other key abilities.

Essential of soft skills :-

Employers may forcast a person's future potential

by considering their soft skills. In particular, employers are broadly looking for:

- Work ethic
- Effective communication
- Teamwork and collaboration
- critical thinking and problem-solving.

Improve Soft Skills:

Since workplace skills are primary tied to behaviour, improving them may involve shifting regular patterns approaches, or thought processes.

1. practise different communication system.
2. Join a group project
3. learn something new
4. socialise with teammates.
5. Suggest Improvement to processes
6. Ask for feedback.

Date : 27/12/24

NAME OF THE EXPERIMENT

GROUP DISCUSSION

Page No.: 23
Roll No. : 4107

Introduction:-

A Group Discussion, often abbreviated as GD, is a popular evaluation technique used by employers during the recruitment process. It is a structured conversation involving a group of Individuals, usually between 6 to 15 participants, who gather to discuss a specific topic or problem.

The types of Group Discussion:-

1. Testing communication skills
2. Teamwork and leadership
3. problem-solving and Decision-making
4. knowledge and awarness
5. Time management
6. convincing and persuasive skills
7. Handing presure

Importance of Group Discussion:-

Group Discussions (GDs) are a critical component of Job Interviews, serving as a dynamic platform to assess a candidate's interpersonal skills, communication (skills) abilities, and problem-solving acumen.

EXPT. No. : 3
Date : 27/12/24

NAME OF THE EXPERIMENT

Page No. : 24
Roll No. : 4107

Do's of a Group Discussion:-

1. prepare throughly: Research the topic, gather information, and organize your thoughts before the discussion.

2. Listen actively: pay attention to others, maintain eye contact and ask clarifying questions to ensure your understand their perspective.

3. participate equally: contribute your ideas and opinions, but also make space for others to share theirs.

4. Stay focused: Stick to the topic and avoid deviating from the main discussion.

5. Respect other's opinions:- Avoid interruping, criticizing or discussing others views. Instead, respond thoughtfully and constructively.

6. use 'I' statements: Express your thoughts and opinions using 'I' statements, which help to avoid blame and defensiveness.

7. Encourage others: Ask open-ended questions, provide feedback, and acknowledge others contribution to foster a collobrative environment.

8. summarize and synthesize: periodically summarize the discussion and synthesize the main points to ensure everyone is on the same page.

NAME OF THE EXPERIMENT

EXPT. No. : 3
Date : 27/12/24

Page No. : 25
Roll No. : 4107

9. Be open-minded: Be willing to consider alternative prespe-
-ctives and adjust your own views of necessary.

10. Maintain a positive tone:- Approach the discussion with a positive and respectful attitude, even when disagreeing the others.

Don't's of a Group Discussion:-

1. Don't dominate the conversation:- Avoid monopolizing the discussion and give others a chance to contribute.

2. Don't interrupt:- Let others finish speaking before you respond or add your thoughts.

3. Don't be confrantational:- Avoid aggressive or the confrantational language, tone or body language.

4. Don't get personal:- Refrain from making personal attacks. insults, or criticisms that can detail the discussion.

5. Don't (leave go off-topics:- stay focused on the topic and avoid introducing unrelated to or tangential issues.

6. Don't be dismissive:- Avoid dismissing other's opinions or ideas without considering their perspectives.

7. Don't be afraid to say I don't know:- It's okay to acknowledge when you are unsure or lack information on a particular topic.

EXPT. No. : 3
Date : 27/12/24

NAME OF THE EXPERIMENT

Page No. : 26
Roll No. : 4107

8. Don't use jargon or technical terms:- Avoid using technical language or jargon that might confuse or intimidate others.

9. Don't be negative or critical:- Focus on finding solutions and offering constructive feedback of the rather than simply criticizing other's ideas.

10. Don't leave without a conclusion:- Ensure that the discussion productive, respectful and effective group discussion that achieves a goal.

By following these do's and dont's, you can facilitate a productive, respectful and effective group discussion that achieves its goals.

Skills Evaluated in Group Discussion:-

1) Communication skills
2) Time management
3) Teamwork
4) leadership
5) problem solving
6) persuasive skills
7) Stress management
8) critical thinking
9) Adaptability
10) knowledge-awareness

1) Tell me something about yourself?

EXPT. No. : 3
Date : 27/12/24

NAME OF THE EXPERIMENT

Page No. : 27
Roll No. : 4107

Activity 1:- Technology is Boon or Bane

Today we are here to discuss whether technology is boon or bane.

Nishma:- I believe that the technology is a huge bane because the misuse of technology such as cyber crime and data breathes poses series. Threat to privacy and security excessive use of smart phones and social media lead to digital addiction, reducing productivity and social interaction.

Nandini:- While I agree with you, I believe that, the technology has it's upsides. It has improved global communication, making it easier to connect with anyone, anywhere instantly and also advances in medical technology have revolutionized health care, saving lifes and improving overall well being.

Sruthi:- on the Flipside, I think we need to consider the environmental impact. Technology, especially electronic waste, is harming the planet. The constant need for upgrading gadgets leads to more e-waste, contributing to the pollution.

Sanjay:- I think technology is definitely a boon. It has made our lives so much easier. Now a days so many people connected with other by using smartphones. Advancements in medicine have saved countless lives.

Tirumala :- I see your point, but I feel technology is becoming a bane too. people are too much adicted to their phones and social media. It is affecting our mental health. If too much addicted social media, people ignored relationships. We are more connected online but disconnected in real life.

srikanth :- That's true. I understand your point, but we can't ignore how technology has improved education, online platforms helps for students to learn online classes during lockdown time. When people had on rely on books or physical classes. During online classes, and save time.

Abhishek :- I agree with you, But technology is also making people lazy? kids today prefer playing video games over outdoor activities. Before technology, kids are playing with their own games. But, new completely addicted to their phones. Even adults are also too much using technology for simple tasks like doing calculations.

sruthi :- I think it's all about how we use technology. If we use it wisely, It's boon, but if we misuse it, it becomes a bane.

Nandini :- I agree with you. But let's not forgot the environmental impact. The production of disposal of electronic devices cause pollution. these contributing to the global warming.

1) Tell me something about yourself?

NAME OF THE EXPERIMENT

EXPT. No. : 3
Date : 27/12/24

Page No. : 29
Roll No. : 4107

Nishma :- I understand your point. But technology is also helping to solve environmental issues. like solar panels and wind turbines. Smart tech can help us use resources more efficiently.

Tirumala :- But, about our privacy, Technology has made it so easy for companies and even government to track our personal data. We might be sacrificing our freedom without even realizing it.

Sanjay :- That's true, but technology also offers better security solutions. for example, helps protect sensitive information, and surveillance tech can prevent crimes.

Sruthi :- Still, there's a thin line between security and invasion of privacy. people should be aware of how their data is being used, and there should be strict regulations.

Srikanth :- I understand your point. But let's not forget how technology connects people during crises. During natural disasters or pandemics, It helps important information quickely and efficiently.

Abhishek :- Also, technology has made healthcare more accessible. Telemedicine allows patients consult doctors from their homes, which is especially helpful in rural areas.

NAME OF THE EXPERIMENT

EXPT. No. : 3
Date : 27/12/24

Page No. : 30
Roll No. : 4107

Sanjay :- I think technology is more of bane, there are issues, but the positives for out weight them in the work place, automation and AI have made tasks more efficient, leading to better productivity.

Tirumala :- on the flipside, I think we need to consider the environmental impact. Technology, especially electronic waste, is harming to the planet. The constant need for upgrading gadgets leads to more e-waste, contributing to pollution.

Srikanth :- But there is also the issue of job displacement with automation taking over many tasks, there is a risk of people losing their livelihood while technology might bring efficiency, we must consider how to reskill the workforce to adapt to these changes.

Abhishek :- I agree with you. The rapid advancement of technology could widen the inequality gap. people inless developed regions may not have aceess to the same technologies, which impact further deepen societial divides.

Nishma :- I agree digital literacy is crucial. If people are aware of risks and benefits, they can make informed decisions.

Sruthi :- It seems that the technology is a double-edged world. Technology is what we make of it. let's use it to create a better future.

EXPT. No.: 3
Date : 27/12/24

NAME OF THE EXPERIMENT

Page No.: 31
Roll No. : 4107

Activity 2:- Reservations should be banned or not

Today we are here to discuss the reservations should be banned or not.

Sruthi:- I believe reservation should be banned because it compromises meritocracy. opportunities should be based on Individual capabilities, not caste or community. Many deserving candidates are left out due to reservation policies, which is unfair.

Deekshi:- I disagree reservation is essential to bridge the gap between privileged and unprivileged communities. It ensures representation for marginalized groups who have been defined opportunities for centuries.

prathyusha:- While reservation has helped marginalized has helped groups, it needs reform. the current system reserved categories, leaving the truly need behind may be we should focus on economic criteria instead of caste.

Tharun:- Yes, caste-based reservation creates division in society. It perpetuates the caste system instead of elminates it. We should focus on providing equal education and opportunities to everyone, irrespective of caste.

Srikanth:- But caste-based discrimination still exists without reservation, many talented individuals from marginalized communities wouldn't have access to qualitey education or Reservation is a corrective measure, not a permanent solution:

EXPT. No. : 3
Date : 27/12/24

NAME OF THE EXPERIMENT

Page No. : 32
Roll No. : 4107

Jaswanth:- Why not periodically review of the reservation policy? we can(relate) reduce quotas over time as equality improves. Meanwhile, focus on improving infrastructure and resources for marginalized communities to ensure they don't need reservations in the future.

Chaitanya:- I agree with you. But, Reservations should be banned. Because, reservations have outlived their purpose. When the constitution was drafted, they were meant as a temporary solution. Talented students often lose out on opportunities because of reservation quotas.

Abhishek:- But, merit can't be viewed in isolation. You're assuming everyone starts from the same level playing field, but that's not true. so many people have poor backgrounds, No quality education, No better resources. like coaching and networks. Reservations try to balance this unfair advantage.

Sruthi:- I get your point, & think reservations sometimes benefit people who no longer need them? for example, children of government officers for wealthy families from reserved categories still claim quotas. It's unfair to economically weaker people from general categories.

Deekshi:- I understand your point. But, I also think the system needs reforms. We could introduce economic criteria along with caste. Because the lower class people are asking about caste, it based on the part of the country. so, they

want be more in reservation. If reservations have the studying people will not get more job. for instance, exclude people will not get more job. for instance, exclude people from reserved categories who are financially. that way, the benefits reach those who tcuely need them.

prathyusha :- I agree with you. But banning reservations entirely isn't the answer. We need to improve the system, not eliminate it. Also, education should focus on building equality from the ground up. If primary education becomes accessible and equal for all, over time, the need for reservations will reduce naturally.

tharun :- I understand your point. But, it social inequalities don't improve as fact as we hope? caste descriminations is deeply (ignored) ingrained, especially in rural areas. Removing reservations too quickly might reverse whatever progress we've made so far. This move faced severe opposition from non-reversed category students, as it reduced seats for the general category.

srikanth :- I agree with you. But, keeping reservation forever isn't solution either. It creates division in society. people start to see each other through the lens of caste, which ironically keeps casteism alive. It wouldn't a merit based system to help us move towards a caste-fee society.

Jaswanth :- I agree with you. But, about cases where less deserving candidates get into top institutions just because of

NAME OF THE EXPERIMENT

EXPT. No.: 9
Date : 27/12/24

Page No.: 34
Roll No. : 4107

of their caste? Isn't unfair to hardworking students from general categories who miss out by a small margin? But isn't time to move towards a needs-based system instead of caste-based one? There are poor people from upper castes who struggle just as much, if not there more, than some reserved category candidates.

Chaitanya:- That's a fair point, but even with reforms, reservations often lead to reverse discrimination. people from unreversed categories who are economically weak don't get the same opportunities. This creates resentment and division in society.

Abhishek:- I understand the frustration, but reservations have helped many under priviliged groups break the cycle of poverty and oppression. If we remove them, we risk undoing decades of progress toward equality.

Prathyusha:- In conclusion, while reservations have played a key role in addressing historical Injustices and ensuring representation, they also face criticism for undermining meritocracy. Instead of banning them outright, reforming the system to include both caste and economic criteria along with improving access to quality education for all, could create a fairer and more inclusive society.

PUBLIC SPEAKING

Page No. : 35
Roll No. : 4107

public speaking is a skill that many people want to improve. Here is some tips to help you feel confident when presenting ideas to group of people.

Tips to improve public speaking :-

1) know your audience
2) practice, practice, practice
3) use feedback to your advantage
4) Make it your own.
5) connect with a personal story.
6) Make eye contact
7) use the stage to your advantage
8) calm your nerves.
9) Make a listening impression with a strong conclusion.

Activity-I :-

Today, I have to share a story-a-story that has inspired millions of people around the world. It's the story of a man who was born without arms and legs but found the strength to live a life full of purpose, passion, and positivity. His name is Nick vujicic.

Nick's life teaches us that our biggest obstacles can become our greatest opportunities if we face them with courage and determination.

Nick vujicic speech:-

"Embracing life without limits":-

Imagine waking up each day without arms and legs. No hands to hold, no feet to walk. sounds unimaginable, right? Now, imagine living your life with these limitations and still finding the courage to live a full and meaningful.

The power of perseverance:-

There's quote that I've always found powerful. "It's not about how many time you fall, but how many times you get back up." Life has a funny ways of challenging us. It throws obstacles in our path, tests or resolve, and at times, makes us question whether we should even continue. But in those moments, it's important to rembeber this:

"Every challenge is an opportunity to grow stronger".

We all face struggles. some of them are small, others feel like mountains. Whether it's a personal setback, a difficult relationship, a professional failure, or a health issue - life will challenge you in ways you never expected. And yes, there will be times when you'll want to give up, to walk away from the fight. But Here's the thing: The only way to truly fail is to quit.

I want you to think for a moment about the most successful people in the world. Are they successful because they've had an easy path? NO. They've faced hardships, failures, and disappointments just like anyone else. The difference is that they didn't let those hard times to break their spirit. Instead, they got back up. And every time they did, they grew stronger, wiser, and more determined.

I'm sure many of you have heard the story of Thomas Edison, the inventor of the light bulb. What you might not know is that edison faced over 1,000 failed attempts before the successfully created the first practical light bulb. Imagine if he had given up after 500 failures ....700...900. Would the world be the same without his invention? probably not. Edison famously said," I have not failed. I've just found, 1,000 ways that won't work."

Edison's mindset is the key. failures is not the opposite of success - it's part of the journey. When you fail, you learn. you grow, and with each failure, you get step closer to success.

There will always be a moment in your journey when you're tested. maybe you'll feel lost.

want be more in reservation. If reservations have the studying people will not get more job. for instance, exclude people will not get more job. for instance, exclude people from reserved categories who are financially. that way, the benefits reach those who tcuely need them.

prathyusha :- I agree with you. But banning reservations entirely isn't the answer. We need to improve the system, not eliminate it. Also, education should focus on building equality from the ground up. If primary education becomes accessible and equal for all, over time, the need for reservations will reduce naturally.

tharun :- I understand your point. But, it social inequalities don't improve as fact as we hope? caste descriminations is deeply (ignored) ingrained, especially in rural areas. Removing reservations too quickly might reverse whatever progress we've made so far. This move faced severe opposition from non-reversed category students, as it reduced seats for the general category.

srikanth :- I agree with you. But, keeping reservation forever isn't solution either. It creates division in society. people start to see each other through the lens of caste, which ironically keeps casteism alive. It wouldn't a merit based system to help us move towards a caste-fee society.

Jaswanth :- I agree with you. But, about cases where less deserving candidates get into top institutions just because of

Nick's parents, Boris and Duksha Vujicic, were initially devastated when they saw their son's condition. There was no medical explanation for his disability, and the family struggled to understand how Nick would live a normal life. As a child, Nick faced significant challenges, both physically and emotionally. Simple tasks like brushing his teeth, getting dressed, or moving around required creativity and determination.

But the greatest challenges Nick faced weren't just physical - they were emotional. Growing up, he was often bullied and felt isolated because of his differences. At the age of 10, overwhelmed by feelings of hopelessness, Nick even attempted to take his own life. However, his love for his family and a newfound sense of faith stopped him. He realized that he wasn't alone and that his life had a purpose.

Nick Vujicic's story has touched the hearts of people worldwide. He has spoken at schools, churches, business, and conferences, often addressing crowds of thousands. One of his most notable speeches was at the world economic form and in front of 110,000 people at a stadium in India.

SWOT Analysis of political Instability on Economic Growth in India :-

* Strengths :-

- policy flexibility :- In politically unstable environments, there may be opportunities to recalibrate policies and strategies to adapt to changing circumstances. This flexibility can lead to innovative approaches in economic management.

- International Aid & support :- politically unstable regions often receive financial aid, loans, or economic assistance from global organizations, which can contribute to infrastructure development and growth.

Weaknesses :-

- Reduced Investment :- political Instability often leads to decreased investor confidence, resulting in lower levels of both domestic and foregin Investments. This reduction can hinder capital formation and economic expansion.

EXPT.No. : 7
Date : 7/2/25

NAME OF THE EXPERIMENT

Page No. : 51
Roll No. : 4107

- policy uncertainity :- Frequent changes in government or policy direction can create an unpredictable business environment, discouraging long-term planning and investment by businesses.
- High Borrowing costs :- Governments in unstable regions and may struggle to secure loans or face higher interest rates, increasing debt burdens and limiting public Invest-ment in infrastructure and development.

Opportunities :-

- Reform Initiatives :- periods of political Instability can serve as catalysts for significant economic and political reforms, potentially leading to more robust and resilient economic structures in the long term
- Diversification :- Businesses may seek to diversify their markets and supply chains to mitigate risks associated with political instability, leading to innovation new market opportunities.
- policy & economic Reforms :- Political crises often push goveron-ments to implement necessary economic reforms, such as deregulation, privatization, or tax restructuring, which can boost growth.

EXPT.No. : 7
Date : 7/2/25

NAME OF THE EXPERIMENT

Page No. : 52
Roll No. : 4107

Threats :-

- Economic contraction :- Sustained political instability can lead to economic (docum) downreturns, as seen in cases where political turmoil disrupts economic activities and diminshes growth prospects.
- capital flight :- uncertainity and instability may prompt investors to withdraw capital from the economy, seeking safer environments, which can exacerbate economic challanges.
- social urest :- political instability can lead to social unrest, which disrupts economic activities, damages infrastructure and further deters investment.

Confidences :-

- Investor distrust :- political instability discourages foregin & domestic.
- Stock market validity :- uncertain policies leads to fluctations in financial markets
- political stability through elutroal Reforms :- Reducing frequent elections can improove Governancy. Threals (T) :- Risks to economic growth.
